

IN THE CLAIMS:

Please amend the claims as follows. The claims are in the format as required by 37 C.F.R. § 1.121.

1. (Currently Amended) A method performed by a computer system, comprising:
storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper, the likeness preserving the appearance of a printed version of a the paper;

at a first location within the electronic version, detecting a reference to a second location, wherein the second location is external to the likeness of the paper, and wherein the detected reference at the first location is associated with a portion displayed in the likeness, and wherein the detected reference at the first location is other than alphanumeric characters of the associated portion of the likeness; and

in response to the detected reference at the first location, embedding a hyperlink within the associated portion displayed in the likeness, wherein the displayed portion of the likeness is highlighted to identify the displayed portion ~~identified~~ to the user as being associated with the ~~hyperlink~~ second location, the hyperlink is selectable by a user in association with the displayed portion of the likeness to cause retrieval of content from the second location and the displaying of content retrieved from the second location on the display device in association with the portion of the likeness.

2. (Previously presented) The method of Claim 1 and comprising:
on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

3. (Canceled).

4. (Canceled).

5. (Previously presented) The method of Claim 1 and comprising:
on the display device, in response to a user command, performing a pan function on the likeness of the paper.

6. (Previously presented) The method of Claim 1 and comprising:
on the display device, in response to a user command, performing a zoom function on the likeness of the paper.

7. (Previously presented) The method of Claim 1 and comprising:
in response to a selection of a portion of the electronic version, displaying the portion on the display device as a likeness of the paper in an enlarged format.

8. (Currently Amended) The method of Claim 1, wherein highlighting the hyperlink displayed portion is highlighted to indicate the hyperlink identify its association with the second location comprises formatting the displayed portion according to a link style or a color.

9. (Currently Amended) A system, comprising:
a computing device for:
storing an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper, the likeness preserving the appearance of a printed version of a the paper;
at a first location within the electronic version, detecting a reference to a second location, wherein the second location is external to the likeness of the paper, and wherein the detected reference at the first location is associated with a portion displayed in the likeness, and wherein the detected reference at the first location is other than alphanumeric characters of the associated portion of the likeness;
and
in response to the detected reference at the first location, embedding a hyperlink within the associated portion displayed in the likeness, wherein the displayed portion of the likeness is highlighted to identify the displayed portion identified to the user as being associated with the hyperlink second location, the hyperlink is selectable by a user in association with the displayed portion of the likeness to cause retrieval of content from the second location and the displaying of content

retrieved from the second location on the display device in association with the portion of the likeness.

10. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, displaying a first selector associated with a first portion of the paper;

on the display device, displaying a second selector associated with a second portion of the paper; and

on the display device, displaying a likeness of the first portion in response to a selection of the first selector.

11. (Canceled).

12. (Canceled).

13. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a pan function on the likeness of the paper.

14. (Previously presented) The system of Claim 9 wherein the computing device is for:

on the display device, in response to a user command, performing a zoom function on the likeness of the paper.

15. (Previously presented) The system of Claim 9 wherein the computing device is for:

in response to a selection of a portion of the electronic version, displaying the portion on the display device as a likeness of the paper in an enlarged format.

16. (Currently Amended) The system of Claim 9, wherein highlighting the hyperlink displayed portion is highlighted to indicate the hyperlink identify its association with the second location comprises formatting the displayed portion according to a link style or a color.

17. (Currently Amended) A computer program product, comprising:
a computer program processable by a computer system for causing the computer system to:
store an electronic version of a paper, the electronic version being displayable on a display device as a likeness of the paper, the likeness preserving the appearance of a printed version of a the paper;
at a first location within the electronic version, detect a reference to a second location, wherein the second location is external to the likeness of the paper, and wherein the detected reference at the first location is associated with a portion displayed in the likeness, and wherein the detected reference at the first location is other than alphanumeric characters of the associated portion of the likeness; and
in response to the detected reference at the first location, embed a hyperlink within the associated displayed in the likeness, wherein the displayed portion of the likeness is highlighted to identify the displayed portion identified to the user as being associated with the hyperlink second location, the hyperlink is selectable by a user in association with the displayed portion of the likeness to cause retrieval of content from the second location and the displaying of content retrieved from the second location on the display device in association with the portion of the likeness; and
an apparatus from which the computer program is accessible by the computer system.

18. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

- on the display device, display a first selector associated with a first portion of the paper;
- on the display device, display a second selector associated with a second portion of the paper; and
- on the display device, display a likeness of the first portion in response to a selection of the first selector.

19. (Canceled).

20. (Canceled).

21. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

- on the display device, in response to a user command, perform a pan function on the likeness of the paper.

22. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

- on the display device, in response to a user command, perform a zoom function on the likeness of the paper.

23. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

- in response to a selection of a portion of the electronic version, display the portion on the display device as a likeness of the paper in an enlarged format.

24. (Currently Amended) The computer program product of Claim 17, wherein highlighting the hyperlink displayed portion is highlighted to indicate the hyperlink identify its association with the second location comprises formatting the displayed portion according to a link style or a color.

25.-27 (Cancelled).

28. (Previously presented) The method of Claim 1:
translating a first version of the paper into the electronic version.
29. (Previously presented) The method of Claim 1, and comprising:
forming a link table in the electronic version; and
in the link table, storing information associated with the hyperlink.
30. (Previously presented) The method of Claim 8, wherein the hyperlink is
highlighted by an indicator to indicate the hyperlink, and comprising:
in response to a user command, selecting a type of the indicator.
- 31.-33. (Cancelled).
34. (Previously presented) The system of Claim 9, wherein the electronic version is a
second electronic version of the paper, and wherein the computing device is for translating a
first electronic version of the paper into the second electronic version.
35. (Previously presented) The system of Claim 9, wherein the computing device is
for:
forming a link table in the electronic version; and
in the link table, storing information associated with the hyperlink.
36. (Previously presented) The system of Claim 16, wherein the hyperlink is
highlighted by an indicator to indicate the hyperlink, and wherein the computing device is for:
in response to a user command, selecting a type of the indicator.
- 37-39. (Cancelled).
40. (Previously presented) The computer program product of Claim 17, wherein the
electronic version is a second electronic version of the paper, and wherein the computer
program is processable by the computer system for causing the computer system to:
translate a first electronic version of the paper into the second electronic version.

41. (Previously presented) The computer program product of Claim 17, wherein the computer program is processable by the computer system for causing the computer system to:
form a link table in the electronic version; and
in the link table, store information associated with the hyperlink.

42. (Previously Presented) The computer program product of Claim 24, wherein the hyperlink is highlighted by an indicator to indicate the hyperlink, and wherein the computer program is processable by the computer system for causing the computer system to:
in response to a user command, select a type of the indicator.

43-45. (Cancelled).

46. (Previously presented) The method of Claim 1 and comprising:
receiving a watch list term;
searching the version for the watch list term; and
displaying a result of the searching.

47. (Previously presented) The method of Claim 46 and comprising:
in response to a selection of the result, displaying a likeness of a portion of the paper associated with the selected result on the display device.

48. (Previously presented) The system of Claim 9 wherein the computing device is for:
receiving a watch list term;
searching the version for the watch list term; and
displaying a result of the searching.

49. (Previously presented) The system of Claim 48 wherein the computing device is for:
in response to a selection of the result, displaying a likeness of a portion of the paper associated with the selected result on the display device.

50. (Previously presented) The computer program product of Claim 17 wherein the computer program is processable by the computer system for causing the computer system to:

- receive a watch list term;
- search the version for the watch list term; and
- display a result of the searching.

51. (Previously presented) The computer program product of Claim 50 wherein the computer program is processable by the computer system for causing the computer system to:

- in response to a selection of the result, display a likeness of a portion of the paper associated with the selected result on the display device.
